

AMENDMENTS TO THE ABSTRACT:

Please amend the Abstract as follows:

~~The invention bears upon a~~ A method and a system are disclosed for providing a certain quality of service to a user-device within a mobile telecommunication system. ~~Said~~ The telecommunication system comprises one or several user-registers linked to a user-device, and one or several priority-tables associated with an area covered by the telecommunication system. A user-register is compared with a priority-table[[,]] when a user-device linked to said user register enters the area associated with said priority-table. The user-device can then be provided with a certain quality of service[[,]] depending on a possible correspondence between ~~said~~ the user-register and ~~said~~ the priority-table.
